

A quick guide:

Private Pilot's Licence PPL(H)

Introduction

Learning to fly a helicopter is undoubtedly one of the most fun, demanding and rewarding experiences that anyone can undertake.

But, for those that feel up to the challenge, we highly recommend testing the water with one of our trial lessons, which start from £105.00.

The PPL(H), is a CAA approved helicopter training course, which once complete and passed, allows you to pilot a helicopter.

Getting Started

No academic qualifications are required to start training.

Dual instruction can begin at any age, although candidates must be 16 to fly solo and 17 for licence issue.

A class 2 medical is required, prior to flying solo. Kuki can arrange this, and help with any other requirements. For more info, just contact info@kuki.co.uk

SAFE TO PASS

Course Structure

PPL courses require a minimum of 45 hours flight time as a pilot, including dual instruction, solo flight time, and solo cross country.

Total flight time is broken down into all 27 air exercises. In addition, seven theory exams must also be passed for the PPL(H) issue.

Rest assured, we'll be with you every step of the way, and our pilots are always happy to pass on their expert knowledge.

Course Timings

All exams must be passed within a period of 18 months.

A skills test is taken at the end of the course, which must be passed to gain your licence. It may not be attempted until all flying and theory training is complete.

Your skills test must be taken within six months of completing instruction, and all sections must be complete within 6 months.

Exercises

- 1/ Aircraft familiarisation / emergency procedures
- 2/ Preparations for and action after flight
- 3/ Air experience
- 4/ Effects of controls
- 5/ Power and altitude changes
- 6/ Climbing and Descending
- 7/ Basic autorotation
- 8/ Hovering
- 9/ Take off and landing
- 10/ Transitions from a hover to hover
- 11/ Circuit, approach, and landing
- 11/ Circuit approach & landing
- 11b/ Steep & ltd power approaches
- 11c/ Circuit Emer procedures
- 12/ First Solo
- 13/ Sideways & backwards hover
- 14/ Spot turns
- 15/ Hover OGE - Vortex ring
- 16/ Simulated EOLs
- 17/ Advanced Autorotation
- 18/ Practice forced landings
- 19/ Steep turns
- 20/ Transitions
- 21/ Quick-stops
- 22/ Navigation
- 23/ Advanced T/O – landings & Trans
- 24/ Sloping ground
- 25/ Limited power
- 26/ Confined areas
- 27/ Basic instrument flying

Next Steps

Once you've passed, you can self-fly helicopters with friends and family across the UK and Europe.

You have the option to take your training further with our additional courses. These include: night rating; commercial pilots licence; and instrument rating.

And if you're feeling flush, you can buy your own machine with us!

Pricing

Prices vary, depending on which helicopter you choose to fly, however our current hourly rates are listed on our website: <http://www.kuki.co.uk/pricing>

If you'd like to speak to us regarding pricing, or anything else for that matter, just contact our Founder, Simon Nicholls - simon@kuki.co.uk
